Go PDF App now available on the iTunes App Store

SnackableApps announces the release of Go PDF V1.0.0 for iOS devices. Go PDF is a utility app creates PDF Pages from web pages and other content displayable in a browser.

BOSTON, MA - FOR IMMEDIATE RELEASE
SnackableApps announces the release of Go PDF V1.0.0 for iOS devices. Go PDF is a utility app creates PDF Pages from web pages and other content displayable in a browser

This easy to use App creates and stores PDF files from web pages, and allows users to share the PDF files via email or print the files via AirPrint. Users can easily send web pages to Go PDF from Safari by simply placing "pdf" in front of the http part of the url. For example pdfhttp://www.google.com.

The development of the Go PDF app was chronicled by the developer in a series of blog posts titled "Journey to App", found at http://fivebytes.blogspot.com/2014/01/journey-to-app-writing-and-publishing.html. The Go PDF App has been released as an open source project hosted at GitHub at https://github.com/timalosi/Journey2App.

The Go PDF app is available for the iPhone and iPad. Go PDF can be download world wide from the iTunes App Store.

Please visit http://www.snackableapps.com for more information, including screenshots of Go PDF. A media kit is available at http://www.snackableapps.com/dl/gopdf/media.zip.

Go PDF was developed by Timothy Alosi, independent software developer and founder of SnackableApps.
